**New Advertisements.**  
For Sale—A. Willford.  
Straw Hats—Winnboro Hotel Bar.  
We Have An Artist—D. Landerdale.  
Paints, Oils, Etc.—Winnboro Drug Store.  
Notice—J. M. Galloway and Others, Corporators.  
McCormick Harvesting Machine—J. F. McMaster & Co.

**Local Briefs.**  
—Wm. Blair was not hung on Friday, his counsel having appealed for a new trial.  
—Campbell General Ellerbe left for Columbia on Tuesday afternoon. He did not quite finish his work here, and left it with the Auditor to complete.  
—We are indebted to J. D. McCarty & Co. for some very fine Florida cabbage. They have six crates in stock. Call early as they are selling rapidly.

—Mr. A. Willford is out to-day in a new advertisement in which he announces that he has a stock of horses, mares and mules that he will either sell or swap. Give him a call.

—D. Landerdale calls attention to-day in a new advertisement to their millinery department which is well stocked. They have a first-class artist in charge, and invite inspection.  
—The contract for furnishing the paint for the new firemen's hall was given to the Winnboro Drug Store, they being the lowest bidders. This speaks well for the enterprise of this young firm.

—We were glad to see our friend Maj. T. W. Woodward on the streets on Friday. The Major has been suffering with rheumatism and has not been in town for nearly a month. He is getting better.  
—We have sent directed envelopes to our correspondents in the different townships of the county, and hope they will make good use of them, as we want to keep our readers posted as to the news of the county.

—Mr. J. M. Beaty will start in a day or two to put the store room in the north end of his building in condition for occupancy by the new Savings and Loan bank, which expects to commence business about May first.

—The frost on Sunday and Monday mornings does very little damage to gardens. Don't give the frost any credit for good intentions, but charge the fact up to rain account, as no garden were planted for the frost to hurt.  
—Master Willie Elliott is going into the raising of pigeons on an extensive scale. He has a large number of various kinds, including carriers, tumbler, owls, and Antwerps. We wish our young friend success in his new enterprise.

—Simpson Pickett one of our well known colored citizens, died suddenly at his home on Thursday night. He had been plowing all day, went home and fed his horse, went to bed and died. We have not learned the cause of his death.  
—Our gardeners have been taking advantage of the last few fine days, and have been doing some good work. One of our town gardeners said on Friday that a little rain was needed. We don't think the farmers would agree with him.

—The public will be glad to learn that Mr. DuBois Eggleston has been re-appointed Postmaster for Winnboro by President Harrison. Mr. Eggleston has served the people long and efficiently, and his re-appointment reflects credit on the administration.  
—The spring stocks of all of our merchants have arrived and are ready for inspection, as you can see by our advertising columns. We would suggest that all our citizens inspect these goods and get prices before they send off for their spring dry and fancy goods.

—The Winnboro Hotel Bar makes a new announcement in to-day's issue. This house is well managed—the proprietor is always glad to meet his friends. He says he has been studying the art of making fine summer drinks, and feels satisfied he can give satisfaction.

—Mr. R. J. McCarty, when he gets through with some important business at Koscusko, Miss., will go from there to Arkansas. He will be in the neighborhood of Monticello in that State, and will be glad to meet any of our subscribers who reside in that State. He says he wants to talk to all of old Fairfield's citizens in Arkansas, and knowing our circulation in that State desires to use our columns to acquaint his friends of his visit.

—Can't our young men get up enough life and energy to organize a baseball club? There was a time when Winnboro had the best club in the State, and all of our citizens enjoyed the games here, and were interested in their success away from home. We remember the large crowds that used to attend the games on the College Green when good playing was done, and good music furnished by the Cornet Band, and think a return of those good old days is desirable. We will lend all the aid in our power to help bring about such return, and we believe our citizens will do likewise.

**WANTED.**—Twenty-five head of good milk cows, fifty head of heifers, springers and dry cows. Parties having such cattle for sale will do well to correspond with me before selling. All correspondence will receive prompt attention either by letter or in person by J. W. POWELL, Monticello, S. C.

**For Over Fifty Years**  
Mrs. Winstow's Sooty-Smoking Tea has been used for over fifty years by thousands of mothers for their children's white teeth, with perfect success. It soothes the child, softens the gums, always all pain, cures wind colic, and is the best remedy for Diarrhea. It will relieve the poor little sufferer immediately. Sold by Druggists in every part of the world. Twenty-five cents a bottle. Be sure and ask for "Mrs. Winstow's Sooty-Smoking Tea," and take no other kind.

Highest of all in Leavening Power.—U. S. Gov't Report, Aug. 17, 1889.

# Royal Baking Powder

ABSOLUTELY PURE

**PAINTS, OILS, VARNISH, ETC.**—The Winnboro Drug Store, in our advertising columns to-day, state that they have in stock a lot of paints, oils, varnish, etc., including a brand of ready mixed paints, of which they have exclusive control at this place, and which they guarantee to give satisfaction. Give them a trial.

**Children Cry for Pitcher's Castoria.**

**WEST POINT APPLICANTS.**—A competitive examination of applicants for West Point from this Congressional District will be held at Laurens on May 5. Fairfield always comes off with the blue ribbons on these sort of occasions, and we hope there will be applicants from this county. The past record of Fairfield at West Point is admirable.

**EVERYBODY CAN SELL CIGARS.**—The Internal Revenue Department calls particular attention to the new law which goes into effect on May 1st. On and after that date the special tax of \$2.40 per year for the right to sell manufactured tobacco and cigars is abolished and everybody can sell the commodities without the customary special license.

**DIVINE SERVICES.**—There were services only in the Methodist and A. R. Presbyterian Churches on Sunday morning, and owing to the fact of there being no preaching elsewhere, and also to the beauty of the day, these churches were crowded. Rev. Mr. Sweeney, of Rock Hill, preached in the evening at 5 o'clock and also at night in the Episcopal Church. The night services were interrupted by the alarm of fire.

**When Baby was sick, we gave her Castoria.**  
When she was a Child, she cried for Castoria.  
When she became a Girl, she clung to Castoria.  
When she had Children, she gave them Castoria.

**A SUGGESTION.**—As our male population seems to have lost all of their patriotism and are devoting their time, energies and money towards accumulating more of the almighty dollars, won't our ladies who never "weary in well doing," and who are always successful in what they undertake, take the matter of erecting a Fairfield arch at the coming Columbia Centennial in hand. We know if they do the arch will go up, and will reflect credit on the county. If they don't we are afraid there will be no arch.

**THE NEW FIREMEN'S HALL.**—The new building being erected on Vandenberg street for the use of the colored fire companies, is nearly finished and presents quite a handsome appearance. It is quite commodious, having plenty of room on the ground floor for the hand engine, and hook and ladder truck, and a large room up-stairs for a meeting room for the different companies. We are glad to see this building erected as it fills a long-felt want, as these companies, by their work in the past, have shown that they deserve attention from the council.

**ENLARGING ERSKINE.**—The committee appointed by the Synod of the Associate Reformed Presbyterian Church to consider the matter of either rebuilding or remodeling Erskine College at Due West, of which the Rev. Jas. T. Chalmers is chairman, held a meeting last week in Due West, where they had a consultation with Architect Deason, of Washington, D. C., and decided to enlarge the recitation rooms, add a two-story lecture room to the old three-story college hall, and upon it erect a handsome observatory, and make some other changes not yet decided upon.

**SUSPECTED MURDER.**—On Saturday Mr. W. Richardson, constable for Trial Justice Jno. D. Blair, brought to town and turned over to the custody of the Sheriff Emeline Green, who is charged with having caused the death of her husband, Jim Green, by poisoning him, by giving him a dose of "Rough on Rats." It appears that Jim died and was buried on February 28th last and nothing said at that time about any foul play, but on the 10th inst., owing to some rumors and charges of foul play, the Trial Justice ordered the body exhumed and a post mortem held. The coroner's jury had to base their verdict on the evidence as to the symptoms describing his death (as there was no chemical analysis of the stomach) and the examination, which shows very many symptoms of a case of poisoning. The stomach was brought to Winnboro to be sent to the State Chemist for analysis.

**FINN.**—On Sunday night about fifteen minutes past 9 o'clock the alarm of fire was sounded for ward 1. Owing to the fact that nearly all the young men were at church or had returned and were talking with their "best girl" about the sermon—nothing else of course—there was a very small delay in getting out the fire apparatus. On reaching the scene it was found to be a servant's house on the premises of Mrs. Louisa Gaillard. The flames had taken possession of the building when the firemen arrived, and the dwelling house of Mrs. Gaillard, also frame, situated within fifteen feet of the burning house, was in danger; but the steam engine quickly got her streams playing followed by the hand

engine with one stream, and the fire was quickly subdued and the dwelling house saved intact. No fire department in the State could have done better work. The colored company responded promptly, and did their usual good work. No loss save the out house, which was occupied by an old colored woman, who lost all her effects. Cause supposed to be either fire from the hearth, or explosion of a lamp.

**Children Cry for Pitcher's Castoria.**  
THE MCCORMICK HARVESTING MACHINE.—J. F. McMaster & Co. will sell the McCormick Harvesting Machine this year. They tell us that the McCormick Company are obliged to make at the rate of one complete machine every minute of the day in order to supply their worldwide demand—the McCormick being almost as well known on the steppes of Russia, the plains of the Danube, and in the winter harvests of the Southern Hemisphere—Australia, South Africa and South America—as it is here. Messrs. McMaster & Co. also showed us a facsimile of the Gold States Medal which the McCormick "machine of steel" won at the great Universal Exposition held at Vienna last summer. The McCormick catalogue, which, by the way, he keeps for gratuitous distribution, is a work of art and will repay careful reading, while the lithographic poster of the historic battle of the Monitor and Merrimack is the finest thing we have ever seen published. When we take into consideration the fact that the McCormick Co. sold 105,468 machines in 1890 the popularity of their harvesters and mowers and the capacity of their mammoth works affords an interesting subject for contemplation.

**PROSPEROUS COLORED CITIZENS.**—We noticed on Saturday afternoon a large load of fodder on the street for sale, and found out it belonged to Joe Davis, who lives on Jackson Creek. He has plenty more of the same kind, besides hay, corn, and peas, of his own raising. Joe is one of our prosperous farmers and his financial condition today refutes the charge that there is no money in farming, and especially in Fairfield. He commenced after the war with nothing but his muscle and to-day owns a good plantation, plenty of stock, raises large crops of corn, hay and peas, always has them to sell, and has his cotton crop almost entirely a surplus. His brother Simon is a farmer of the same class, and besides owning a good plantation on Jackson Creek, has recently bought sixteen acres of land within the corporate limits of town for \$1,350. The same man went to a dealer in gunnys on Saturday to buy some gunnys. The dealer asked him if he wanted the best ammunition goods, when Davis replied, he did not, as he wanted more potash and less ammonia, his land producing too much weed now; what he wanted was fruit. This shows he is not working unintelligently. It affords us pleasure to record instances of this kind, and we would be glad to hear of many more just such farmers.

## HAS OUR LABOR BEEN IN VAIN?

The following is from a special from Chester to the Charleston Weekly.  
CHESTER, April 8.—[Special.]—Mr. C. H. Ragsdale, chief engineer of the Cape Fear and Cincinnati railroad, has received orders to locate the road through Chester county; first from the town of Chester to Broad river, then from Chester to Catawba Falls, on Catawba river—a distance in all of about 40 miles. Engineer Ragsdale expects to begin work in a few days. Let us hear from you Mr. Vice-President Norton.

A Capital Number.

The *Mechanical News* for April 1 is decidedly the choicest number yet issued of that old and popular journal. The frontispiece is an excellent portrait of Abraham S. Hewitt, and there are three other half-tone engravings, one of which is a full-page view of the magnificent new passenger station of the Pennsylvania Railroad in Jersey City. In all, this number contains sixteen illustrations, and among the leading articles are: Mill Gearing and its Properties, by C. R. Tompkins, M. E.; Twist Drill Testing Machine, by Rufus Anderson, M. E.; What is Steel? Railway Accidents and their Prevention, by an Engineer; and several illustrations of Recent Mechanical Improvements.

The *Mechanical News* is one of the oldest scientific journals in the country, being now in its twenty-first year, and has recently adopted the quarto form, with 32 pages and a handsome cover. It is printed on heavy paper, and its engravings are of the finest character, especially those by the half-toned process. A department of "Household Mechanics," profusely illustrated, will be a leading feature of the next number, and will be continued through the volume. This attractive journal is published twice a month, at \$1.50 a year (24 numbers), or \$1.00 for six months. Sample copies, ten cents. Address the *Mechanical News*, James Leitch & Co., Publishers, 110 Liberty Street, New York.

## CENTRE SHOTS.

Farmers are far behind with their work for the season. Sand hill corn is coming up. Clay lands are just being planted. Very little cotton has been planted in this section. The general complaint heretofore has been too wet to plow but the complaint has changed to too hard and dry.

The health of this community is generally good since the grip has let loose. Chicken thieves still prowled around after dark and prey upon the contents of the fowl house. But look out rogues, there is death in store for you yet.

## THE GORDON'S ANNIVERSARY.

The Gordon Light Infantry held their annual meeting (it being the fifteenth anniversary of their organization) on Friday night last in their armory. At the election the following officers were elected:  
Captain—W. G. Jordan.  
1st Lieutenant—J. H. Cummings.  
2nd Lieutenant—J. W. Seigler.  
Junior 2nd Lieutenant—J. E. McDonald.  
Secretary and Treasurer—C. M. Chandler.

The company decided to give Adjutant General Farley an entertainment on Monday night in the armory. The company meeting adjourned, and as is the custom of the company, the commissioned officers met and appointed the following non-commissioned officers:  
1st Sergeant, T. W. Lauderdale;  
2nd Sergeant, M. W. Doty; 3rd Sergeant, D. G. Dwight; 4th Sergeant, C. M. Chandler; 5th Sergeant, T. M. Jordan.

Corporals, H. Y. Milling, H. Landecker, E. P. Matthews, J. B. Crosby. Captain Jordan has been in command of the company ever since its organization, and its condition at this time speaks for itself as to the efficiency of its administration.

The advancement of J. E. McDonald to the position of Junior 2nd Lieutenant and T. W. Lauderdale to that of Orderly Sergeant are well deserved promotions, they having earned them by long and efficient service.

## Stand Your Ground.

When you make up your mind to take Hood's Sarsaparilla, do not be induced to buy some other preparation. Clerks may claim that "ours is as good as Hood's" and all that; but the peculiar merit of Hood's Sarsaparilla cannot be equalled. Therefore have nothing to do with substitutes and insist upon having Hood's Sarsaparilla, the best blood purifier and building-up medicine.

## THE INDUSTRIAL SCHOOL.

Reasons Why the School Should be Located in Winnboro.

Messrs. Editors: During the past decade there has been, probably, no subject or question involving the interest and advancement of the town more than that of the location of the "Industrial School for Females," as proposed by a recent Act of the Legislature, to be built and located on certain terms and conditions, approved by a committee of three persons—two being females.

It is unnecessary to say anything in regard to the curriculum to be adopted, or put in operation in such school. That, no doubt, will be wisely prepared. The main question for consideration by the community is to make the effort to secure the building site or location for such an institution.

Two points, seems to me, worthy of consideration only—first, the central location of such school, making it easily and speedily accessible. Outside of Columbia, I know of no town more favorably situated in this respect than Winnboro, as every one can see for himself. Secondly, the healthfulness or sanitary conditions of the place.

In this respect, I do not believe there is a spot in the State more healthy; there are no local causes for disease; the town is upon an elevated ridge, in the best latitude for pure water; the temperature is such as not uncomfortable either summer or winter. It is unnecessary to state further any other

## advantages to recommend the town.

The practical subject of most importance for consideration is this:  
What are the inducements to offer to satisfy the committee and secure their acceptance of our proposal?  
I, therefore, briefly suggest that the Council call a meeting of the voters and get an expression of opinion in regard to the propriety of donating the park, and also a two or three-acre lot adjoining for a proximal building, and then raising an additional amount of \$10,000 by an issuance of bonds to run twenty-five or thirty years.

This appears possible and probable that the committee, after a visit here, may accept the proposition made them. If so, the future will justify the proposal. If not, then nothing lost, nothing gained.

—After a varied experience with many so-called cathartic remedies, I am convinced that Ayer's Pills give the most satisfactory results. I rely exclusively on these Pills for the cure of liver and stomach complaints.—John B. Bell, Sr., Abilene, Texas.

## AN ORGANIZATION PERFECTED.

The Savings and Investment Company met in the Town Hall Monday evening, and after finding that a majority of the stock was represented proceeded to perfect the organization of the company. After the adoption of a constitution the following gentlemen were elected directors to serve this year: A. Willford, Saml. Cathcart, T. W. Lauderdale, J. F. McMaster, A. B. Cathcart, U. G. Desportes, T. K. Elliott, T. H. Ketchin, W. H. Flenniken.

At a meeting of the board afterwards the following officers were elected:  
President—T. W. Lauderdale.  
Vice-President—T. H. Ketchin.  
Treasurer—T. K. Elliott.  
Attorneys—Ragsdale & Ragsdale.  
Secretary—J. F. McMaster.

The company will call for the first payment on the 15th of this month and other payments on the 15th of each month thereafter. They will be prepared to loan money just as soon as the first payment is made upon security such as is usually taken by companies of this character on real estate or personal security.

This is our third financial institution, and we predict for it a successful future.

## EAST WATEREN SHIPPERS.

We have been once more privileged with a few days of sunshine, although it felt like the blast of winter had come in the bud of spring; yet we are hopeful of having spring weather before August.

The farmers have spent the greater part of the past week planting corn. Cotton planting will commence next week and with favorable weather will finish about the first of May. Both fall and spring sown oats are looking well. Very little wheat was sown.

The Wateren Prize Club spent a very pleasant day at Mr. T. W. Rawls' last Friday. A splendid dinner was served. Mr. Jesse Sutton, who is visiting from Louisiana, and Miss Mamie Rawls, of East Wateren, have been visiting relatives in Lancaster County. Mrs. J. G. White and Mrs. J. M. Hood, after a week's visit in this section, returned to their homes in Chester County to-day.

## FEASTVILLE ITEMS.

We are having some very nice weather for field work, and it seems from the voice of the distant plowman that our brother farmers are busily engaged preparing their lands to plant. Some have already been planting corn and others contemplate planting more within the next week.

Miss Fannie Crosby returned to Winnboro last week.  
Dr. C. N. Hough returned from Baltimore last week, where he has been under medical treatment for his eyesight. His many friends wish him a speedy recovery.

Mr. J. B. Crosby, County Auditor, paid this section a flying visit some days ago.  
Two peddlers passed through this section this week trading in jewelry, etc. They claimed to be Assyrians, but some thought they were Italians.

The health of the community is not as good as we would like it to be. Some of our most enthusiastic citizens, especially those who manifest so much interest in the Cape Fear and Cincinnati road, seem to be growing somewhat dispondent for fear the road will not be built. A great many have been conjecturing as to what route it will take if built. Let the company survey the different routes and then the hand writing will be on the wall, to use a scriptural phrase in a practical way.

A great many want the road to run right by their doors; some want it to run just in sight of their house; and some do not want it to run through their plantations but don't care where it runs just so they will build a station within three or four miles of where they live. If there was to be an election held to decide and locate the line of road, I fear it would be a complete failure, for we could not get enough to agree on one line to make a quorum if they were working in an organized way. I think your many readers would be glad to hear something favorable concerning the road. They have complied with the companies' proposition, and thereby showed a willingness to do anything within their power to develop the agricultural, mechanical, and financial interests of the county. The railroad question is absorbing a large share of public attention, and justly so, for we are badly in need of railroad facilities.

It would be a marvel to see a well equipped train of cars run over a line of railroad through this section. Some would just stop their plow and hold their horse by the bridle for fear of a runaway; others would, perhaps, be overcome with delight and let loose plow stock, line and all. But without standing all this, our people realize the fact that they live in an age of progress.

Thousands of dollars worth of chickens are destroyed by Cholera every year. It is more fatal to them than all other diseases combined. But the discovery of a liquid remedy that positively destroys the Microbes has been made. Half of the young chickens are killed by Microbes before they are fyers. A 50-cent bottle is enough for 100 chickens. It is guaranteed. If after using two-thirds of a bottle you are not satisfied with it as a cure for Cholera, return it to the druggist from whom you purchased it, and he will refund your money.

For sale by  
DR. W. E. AIKEN  
Winnboro S. C.

## RUBBLE FROM ROCK CITY.

A committee has been appointed to raise funds to build a meeting house. Mr. A. M. Creighton has sold his filly that he rode during the war and bought a mule.

Mr. C. L. Smith is missing very often from the quarry. He has been spotted near the creek, just this side of the bridge.  
Mr. John Humphries will enter his sorrel next November at the fair.  
Hotel de Sauton lost a most beautiful Masiff. No. 85 collided with its head.

Uncle Jesse has moved on the hill to get a better view of his old love.  
Cottage No. 6 wedding bells will soon be sounded. Simpson has captured the prize. What is the trouble with the boys of Rock City?

Base ball is all the go now with the block makers. They have called a meeting to-night. More next time.  
A long visit from Dr. I. T. Smith and Mr. A. Hayes yesterday.

Mr. L. D. Robinson had quite a narrow escape Wednesday night going home. He tried to see how near he could drive by a ditch.  
Mr. R. L. Black, agent, is visiting very often in the evenings at the quarry. Look out boys.

The Nicholson Hotel has beautified its dining room.  
No end of shipments of paving blocks, dimension stone and dressed granite.

Mr. George Timman has returned from Alabama and is working at the quarry.  
Brother Stark sings hymns all day while working.

It takes two beavers to supply the quarry on Saturday and Mr. T. F. Lurie supplies the same.  
Mr. Ed. Goley is breaking in Aleck's mule. He says it will not take long.

Rion, April 11.  
—Scrofula is transmitted from parent to child, and thus becomes a family inheritance for generations. It is, therefore, the duty of every scrupulous person to cleanse his blood by a thorough and persistent course of Ayer's Sarsaparilla.
